1.3 million+
RAC members

2.6
million
phone calls
handled

10,500+
missions since 2003

389,000
Roadside Assistance
callouts

585
children and pets
rescued from locked cars

Regional Road Safety Program

\$1 billion+
secured for regional road upgrades

RAC Air Health Monitor

73,000+
daily measurements generated

212,000+
insurance claims

**\$931
million**
paid in claims

**Nine parks
and resorts
across WA**

67,000+
students educated
on road safety

Trust was at an all time low

Inconsistency, complexity, lack of context.

- Legacy data warehouse (10+ years) with many defunct reports
- Business users didn't understand how many metrics were calculated
- Manually copying/pasting data into other spreadsheets for custom reporting – loads of duplication & inconsistency
- Execs spending more time 'questioning numbers' than discussing outcomes and impact

***"We have 1.2million
Members...
PLUS/MINUS 10%"***

Designing for Confidence

Engineering Trust through Visibility – Project Theseus

- Simplified data sources → single trusted ecosystem
- Retired legacy platforms, improved lineage and governance. Introduced AI.
- United data, business knowledge and leadership under a common definition of truth
- Enabled exec dashboards that spoke in business terms

From Data Doubt to Decision Confidence

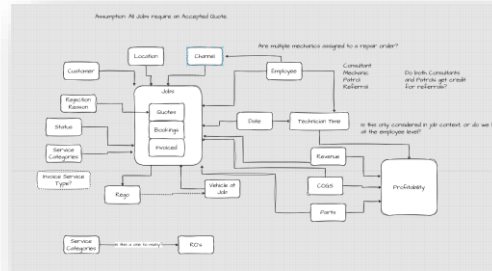

Not 'Lift N' Shift', but Re-engineered from the ground up

Requirements

As a...	I want...	So that...
General Manager	to track on a daily basis early in the morning before the centres are open, how each centre is performing on key KPIs vs targets to allow us to run the business and make decisions on whether we need the different Centre Development Managers (CDM) to take actions.	understand what the reasons of low performances on a centre level are and have discussions with the Centre Development Managers (CDM) on what the cause of it, such as what resourcing level are, good service advisors on counter, individual performance issues, level of low and repairs; centre capacity, number of bookings.
Marketing Manager	have one report when we run campaigns like we are running now with a summer campaign that goes for three months just to have that breakdown what the sales channels are, how many leads we got, what the conversion rate was for those leads and how many jobs we got out of it.	identify any audiences for digital channels and also for like business planning, campaign reporting, there were some promo codes, promo types in there as well.

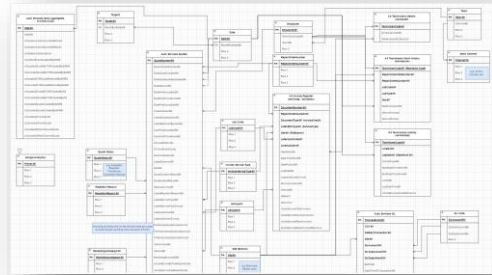

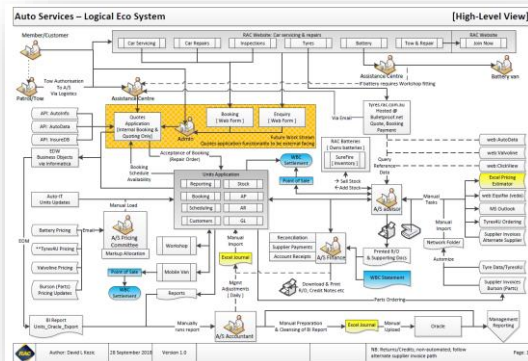

Data & Logical Model

Dimensions and Measures

Dimension Table	Status	Priority	Outstanding Items
Date	WIP	1st	
Employee	IN REVISION	2nd	need to consider how CDMs, AutoQuotes and Units logins are mapped to employees Multiple employees are assigned to a job
Channel (eg online, counter)	WIP	3rd	
Site (mobile vans + branches)	NOT STARTED	3rd	could be mapped to Location
Quote Status	NOT STARTED	3rd	
Rejection Reason	NOT STARTED	3rd	
Service Category	NOT STARTED	3rd	
Service Job	NOT STARTED	3rd	
Service Location	NOT STARTED	3rd	
Invoice Service Types	NOT STARTED	3rd	
GL Code	NOT STARTED	3rd	

Business Process Model

Process ID	Measure Name	Status	Definition	Inclusions	Exclusions	Calculation	Owner / Entity	Proposed Date	Start/End / Scenario Model	Report / Documentation	To Do
1	Transformed Quote #	WIP	The count of quotes currently in the Transformed status			$\frac{\text{Count of quotes in Transformed status}}{\text{Count of quotes in Accepted status}}$	Service, Sales, Marketing, Finance, HR, IT, Legal, Compliance, Marketing, Sales, Training, Quality, Safety, Environment, Health & Safety, Risk, Security, Information Security, Data Protection, Accessibility, Sustainability, Social Responsibility, Community, Partners, Suppliers, Vendors, Contractors, Subcontractors, Outsourcing, Freelance, Consultants, Agencies	2023-01-01	2023-01-01	WIP	
2	Rejected Quote #	WIP	The count of quotes currently in the Rejected status			$\frac{\text{Count of quotes in Rejected status}}{\text{Count of quotes in Accepted status}}$	Service, Sales, Marketing, Finance, HR, IT, Legal, Compliance, Marketing, Sales, Training, Quality, Safety, Environment, Health & Safety, Risk, Security, Information Security, Data Protection, Accessibility, Sustainability, Social Responsibility, Community, Partners, Suppliers, Vendors, Contractors, Subcontractors, Outsourcing, Freelance, Consultants, Agencies	2023-01-01	2023-01-01	WIP	
3	Accepted Quote #	WIP	The count of quotes currently in the Accepted status			$\frac{\text{Count of quotes in Accepted status}}{\text{Count of quotes in Accepted status}}$	Service, Sales, Marketing, Finance, HR, IT, Legal, Compliance, Marketing, Sales, Training, Quality, Safety, Environment, Health & Safety, Risk, Security, Information Security, Data Protection, Accessibility, Sustainability, Social Responsibility, Community, Partners, Suppliers, Vendors, Contractors, Subcontractors, Outsourcing, Freelance, Consultants, Agencies	2023-01-01	2023-01-01	WIP

Automation

Trust

AI Enabled

Enabling Trust in Data

Data teams often speak in models and metrics. Executives speak in impact and risk.

What financial benefits do members gain from partners, and how can we use that to grow the base?
How can we optimise our sales funnels? What predictors increase Products Per Member?

Financial Benefits

How can we incentivise for our Patrols serving our Members on the roads?
What are the predictors of breakdowns, and how can we optimise the workforce?

Operational Benefits

How can we better plan our call centre agent's capacity?
How can we forecast claims liabilities from severe weather events?

Business Improvement

Lessons Learned

Building Trust Takes Three Things
